

# Remote CCTV Monitoring

Peace of Mind is Priceless

## *Your Property is Safe in Our Hands*

GGL Security works round the clock. We have our own 24/7 fully-certified International Monitoring Centre. Our services are technology-based and intelligence led. We monitor remotely CCTV systems with voice over intercom as part of our overall security programme. Our Monitoring Centre Staff are trained to the highest standards and will respond to incidents as they occur.

### The Facts

- › CCTV Virtual Patrols cut your security costs dramatically.
- › CCTV and motion detectors can warn you that an incident is about to occur and provide evidence later - many criminals have been convicted on the strength of CCTV evidence.
- › CCTV Systems can now be linked to voice over intercom systems to warn off trespassers.

### The Solution

- › GGL's Remote CCTV Monitoring gives our Monitoring Centre visual access to your premises through your camera system. If your alarm is activated, we access your camera system and carry out a site patrol to identify any intruders on your premises.
- › GGL also offers a voice over intercom system, which acts as a strong deterrent to intruders. Once we have located the intruder on camera, we speak to them and advise them to leave the premises. This is a powerful tool in persuading intruders to leave the site without causing loss or damage.
- › Our remote system allows setting and deactivation of alarms, turns on and off lights, opens and closes gates and provides intercom capability to a premises.
- › GGL's remote CCTV monitoring allows us to carry out virtual patrols on your premises randomly.

### The Result

- › Huge cost savings for you - GGL's remote CCTV monitoring reduces or eliminates manpower.
- › It's easier to identify intruders visually and view the incident live.
- › An immediate response is possible before Gardaí or owners get there.
- › Peace of mind is priceless.
