

Global Supply Chain and Logistics Security

Peace of Mind is Priceless

GGL's Supply Chain and Logistics Security Programme has the flexibility and capability to deliver globally - we are wherever you need us to be.

The Facts

- › Managed delivery of cargo on time to end destination is a customer priority.
- › Secure processes and procedures optimise the security of your supply chain.
- › A proactive and professional Logistics Security Programme will increase the overall visibility of your logistics network.
- › It is important for suppliers to reduce as much as possible potential for accidents, delays, theft or hijackings in transit shipments.
- › Product that is security tracked and monitored will more likely be delivered intact, secure and on time.

The Solution

GGL has years of experience globally managing and successfully delivering Supply Chain and Logistics Security Solutions. We provide integrated security management and technology solutions.

- › **On-Site Manager** - Management, measurement and reporting on your Supply Chain and Logistics Security programme.
- › **Risk Assessment** - Audit and implementation of agreed Customer Security Requirements.
- › **Carrier Management** - Loss investigation, analysis and loss prevention planning with actions of contracted carriers and their sub contractors.
- › **Route Planning** - Identifying recognised safe routes and secure parking facilities, through intelligence and risk profiling.
- › **Service Improvements** - Provide logistic security improvements within the customers operations to reduce loss and implement cost reductions.
- › **Satellite Tracking** - Use of market leading technology GPS/GPRS/SMS Tracking Systems on selected assets.
- › **Escorts/Quality Control Officers** - Continuous monitoring of your transport network by discreet use of Quality Control Officers of goods in transit on the Planned Routing.
- › **Remote Monitoring** - Monitoring of on-site container traffic and personnel movements via CCTV, alarm activations and satellite tracking units within your facility through our International Monitoring Centre.

The Result

- › Complete visibility of your Supply Chain Security Logistics Network.
- › Global visibility and reach through our International Monitoring Centre.
- › Combination of expert Security Management and Advanced Technology Solutions.
- › Measured Loss Prevention reporting programme.
- › "Live" situational response and updates for assets in transit.
- › One Provider - One Solution - One Central Point of Contact.
- › Peace of mind is priceless.
