

Truck Track

Peace of Mind is Priceless

Your Driver Security and Business Assets are Our Priority

Truck Track is GGL's Satellite Tracking Programme and has the technical intelligence and capability to deliver globally - we are wherever you need us to be.

The Facts

- › Truck Track provides a customer with a definite business advantage.
- › Products in transit are at a higher risk to loss, misroute, damage or theft.
- › A managed Satellite Tracking System enhances the safety of drivers, staff and products.
- › Response time is crucial in limiting losses and incidents en-route.
- › A journey that's Tracked and Monitored is a safer and more secure journey.

The Solution

Truck Track

We have the technical capability to host **any** make of tracking unit on our software and servers in the GGL Monitoring Centre, without compromising any of the original installation configurations. Truck Track is an added value transport management service to your current tracking programme.

GGL has the expertise and ability to provide 24 X 7 Tracking of GPS / GPRS / SMS units through our state-of-the-art International Monitoring Centre.

- › Our International Monitoring Centre Tracking Programme provides:
 - **Live Tracking:** Location checking against an agreed timeframe in real time.
 - **Realtime Tracking:** Action in the event of an alarm.
 - **Asset Tracking/Recovery:** Mobile Satellite Tracking units placed discreetly and unobtrusively with the assets.

The Result

- › Truck Track can monitor the satellite tracking units you've already bought and installed - no further investment required.
- › GGL Security's International Monitoring Centre has full journey visibility tracking.
- › GGL Security's International Monitoring Centre will respond immediately 24 X 7 X 365, assistance is at hand.
- › You know your driver and your assets are better protected at all times.
- › Peace of mind is priceless.
